

Simple Mileage Tracker

BUSINESS MILEAGE, DONE PROPERLY

iOS

Android

✓ One-off payment — no subscription

Stop guessing. Start claiming.

If you drive for work, every business mile is worth money back. But HMRC requires proper records — not a rough estimate. Simple Mileage Tracker logs every journey in seconds, so your mileage claim is ready when you need it.

✓ HMRC allows **45p per mile** for the first 10,000 business miles — **£4,500 a year** you could be claiming

Log journeys in seconds

Enter your odometer reading at the start and end of each trip. Add a reason and date. Done. Or just type in the miles — whichever works for you.

Export PDF & CSV reports

Generate monthly mileage claim PDFs and annual CSV files — formatted and ready to hand to your accountant or attach to your Self Assessment return.

No GPS — no battery drain

Unlike most mileage apps, there's no background GPS running all day. Your battery stays charged and your data usage stays low.

Separate by job or project

Use categories to split mileage across different employers, clients, or contracts. Your reports stay organised without any sorting at the end of the month.

Track fuel usage too

Monitor your fuel consumption alongside your mileage. Works in miles or km, and supports Imperial gallons, US gallons, and litres.

MOT & road tax reminders

Get notified before your UK MOT and road tax are due. No more unexpected lapses or last-minute scrambles.

How it works

- 1 Download the app — one-off payment, no subscription
- 2 Log each business journey as you go — takes under 10 seconds
- 3 Export your mileage report and claim what you're owed
